

## Shadow Drawing

### Materials / Items Needed:

- Pens 4 or 5 different colours
- Paper
- Different shaped toys

Place some toys on a piece of paper and draw their shadow as it falls. Go back an hour or so later to draw again and see how the shadows have changed.

This can be done throughout the day and use different colour pens each time. You can then extend this by talking about how the sun moves around the planet, high and low tides and the different seasons we have.
